Dear Sir/Madam,

**Sub.: Publication of Postal Ballot Notice**

Pursuant to Regulation 47 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we hereby enclose copies of Postal Ballot Notice of the company published in Economic Times (English) & Navshakti (Marathi), on Saturday, 14<sup>th</sup> May 2022.

Kindly take note of the same.

Thanking you,

Yours faithfully,

**GAURANG SHAH**

*VP – Legal & Company Secretary*

REAPING BENEFITS OF GLOBAL FOODGRAIN SCARCITY

# Wheat Demand Doing What Farm Laws could have Done

Farmers selling wheat at lucrative prices to traders, ignoring govt's MSP purchases

Jayashree.Bhosale @timesgroup.com

**Pune:** The government may have been forced to withdraw the three farm laws, but the global foodgrains scarcity and demand for wheat have created a market where the farmers are reaping the gains promised by the reforms these laws were designed to usher in.

Farmers are selling wheat at lucrative prices to private trade, as demand for exports has skyrocketed, ignoring the government's purchases at minimum support price. "Actually, many things related to the farm laws are happening. You can see them happening," finance minister Nirmala Sitharaman had said at the ET Awards last week.

Experts said this is how the agricultural markets should function - government procurement should offer a floor while the bigger markets work on commercial principles.

After more than a year of protests by farmers, the government had repealed the three laws - The Farmers'

## Making Hay

Spirit of farm laws being implemented, says FM

**Markets paying much higher price for wheat than MSP**

**Farmers shun government's wheat procurement, which has fallen by 55%**

**Punjab, Haryana farmers missed the export opportunity**

**Farmers say 70% of farm law provisions were pro-farmers**

Produce Trade and Commerce Promotion and Facilitation Act, The Farmers' (Empowerment and Protection) Agreement of Price Assurance and Farm Services Act and The Essential Commodities (Amendment) Act.

"Farmers are selling for export. They do not want to come for MSP because they find a better price somewhere else," said Sitharaman, when asked whether the government was thinking of bringing the farm laws back.

The Centre had to cut MSP

procurement target by 55% to 19.5 million tonnes from 44 million tonnes as farmers turned their back towards the procurement centres.

Anil Ghanvat, member of the Supreme Court-appointed committee on farm laws, said, "Many farmers benefited from the wheat exports. Many farmers got up to ₹2,500 per quintal against the MSP of ₹2,015 per quintal."

However, as the government is now considering putting some restrictions on exports to control domestic inflation, Ghanvat said, "If the farm laws had been passed, it would have been difficult for any government to restrict the export process under the pressure of any segment."

Sitharaman said, "Many states have started to see the benefits of liberating farmers. And there is just no one stopping them from doing it. In spirit, the three farm laws are happening."

States like Madhya Pradesh have proactively supported wheat exporters by giving them various incentives. However, farmers from Punjab and Haryana could not reap benefits of wheat exports due to high taxation and quality issues.

Some progressive farmers from Punjab and Haryana privately admitted that had the farm laws been passed, it could have helped wheat exports.

## 'UAE Committed Investments of \$100 b in India'

**New Delhi:** Commerce and industry minister Piyush Goyal said on Friday that the United Arab Emirates has committed investments of \$100 billion in India in manufacturing, infrastructure and services.

He said bilateral trade can go up to \$250 billion by 2030 under the India-UAE Comprehensive Economic Partnership Agreement (CEPA).

"The commitment from UAE is to look at over \$100 billion of investment to India in different sectors such as manufacturing, infrastructure, services," Goyal said at the India-UAE Economic Partnership Summit in Mumbai organised by the Confederation of Indian Industry where he launched 'India-UAE Start Up Bridge' with the UAE's minister of economy Abdullah Al-Mari.

—Our Bureau

## S&P GLOBAL MARKET INTELLIGENCE PEGS IT AT 5% OF INDIA'S OIL IMPORTS IN APRIL

# Russian Crude's Share in Imports Rises

Our Bureau

**New Delhi:** Russian-origin crude made up 5% of India's total oil imports in April for the first time, rising from under 1% in 2021 and the first quarter of 2022, as refiners chased cheaper oil amid expanding demand and spiralling prices, according to S&P Global Market Intelligence.

"As of May 9, almost 10 million barrels of crude loading from Russia—including 970,000 barrels of Kazakhstan's CPC Blend—have discharged in India this month," the S&P Global Market Intelligence said. "Another 16 vessels with 13 million barrels are currently indicating India as their destination and are expected to arrive in the next four weeks."

The outbreak of the Ukraine war in late February pushed up oil prices and triggered large-scale Western economic sanctions against Russia. This forced several traditional buyers to shun Russian oil and greatly widened its discount to Brent, a global benchmark.

**MIDDLE EAST CRUDE**  
**Share of crude from Middle East increased to a record 73% in April, up from 69% in March**

Refiners have been highly attracted to discounts for Russian-origin cargoes and India has been a major

alternative destination for Urals crude that would typically have been sold to refiners in Europe," said Yen Ling Song, associate director at S&P Global Market Intelligence. "Conversely, stronger demand from European end-users for other Atlantic Basin crudes—to replace Russian cargoes—pushed up these procurement costs, and India has instead turned more to the Middle East in the last month."

India's crude oil imports crossed 4.8 million barrels per day in April, the highest on record, with higher Middle East and Russian volumes displacing cargoes from further afield, such as the US, Canada and West Africa, as per S&P.

The share of crudes from the Middle East region increased to a record 73% in April, up from 69% in March and 67% in February. Iraq remained the top supplier to India, with flows stable at a combined 1.2 million barrels per day.

# Monsoon Likely to Arrive Early This Year: Met Dept

**RAIN GAIN** IMD says southwest monsoon may advance into Kerala on May 27 with a model error of +/-4 days; storage of reservoirs rises

Our Bureau

**New Delhi:** The Southwest Monsoon is likely to advance into Kerala earlier than normal this year, the India Meteorological Department (IMD) has said on Friday.

"This year, the onset of southwest monsoon over Kerala is likely to be earlier than normal date of onset," it said in a statement. "The monsoon onset over Kerala is likely to be on May 27 with a model error of ±4 days."

The weather office added that the advance of the southwest monsoon over the Indian mainland is marked by monsoon onset over Kerala and is an important indicator characterizing the transition from a hot and dry season to a rainy season.

In the Indian monsoon re-

JIPSON SIKHERA

May 22," IMD said.

Conditions are becoming favourable for the advance of Southwest Monsoon into South Andaman Sea, Nicobar Islands and some parts of southeast Bay of Bengal, around May 15, 2022, it said.

The southwest monsoon contributes 74.9% to annual rainfall. The June-September monsoon is vital for farm output and economic growth as about 60% of India's farmland depends on rainfall.

#### RESERVOIR STATUS

Live storage of 140 important reservoirs in the week ending May 12 is 58,759 billion cubic metre (BCM), which is 12,869 BCM more than the average of the last 10 years, said the Central Water Commission.

This equals 33% of the storage capacity at the full reservoir level.

## Data Crucial for Accountability in Democracy: Niti Aayog VC

Our Bureau

**New Delhi:** Data in a democracy is very important for accountability and India has considerable expertise and a rich history in this regard, Niti Aayog vice chairman Suman K Bery said on Friday.

Speaking at the launch of Niti Aayog's National Data & Analytics Platform (NDAP), Bery said NDAP aims to democratise access to government data by making data accessible, interoperable and interactive for open public use. "India has considerable expertise and a rich history in data. But it is also the case that the struggle for transparency, including the national sample survey, has been a long journey," said Bery.

The platform hosts foundational datasets from various government agencies, presents them coherently and provides tools for analytics and visualisation.

In August 2021, the Aayog had provided access to the platform to a limited number of users for testing and feedback.

According to Niti Aayog CEO Amitabh Kant, the rise of data and digital technologies is rapidly transforming economies and societies, with enormous implications for governments' daily operations. "NDAP is a critical milestone - which aims to aid India's progress by promoting data-driven disclosure, decision-making and ensuring availability of data connecting till the last mile - is an example of how the power of data can be leveraged," said Kant.
